HPE - Dell - Brocade

Networking

Cisco - Juniper
HPE - Aruba

It PAYS to sell DataSpan your old enterprise IT hardware. This enables you to have more funds in your IT budget for data center projects and/ or cloud adoption initiatives.

Fund More IT Projects

Get cash or trade-in value for your used IT equipment and have more money to spend on new equipment purchases or projects that you have been putting off due to lack of budget.

Speed Up Cloud Initiatives

More customers are moving to the cloud instead of buying and managing their own IT infrastructure. Regardless of what you decide about adopting the cloud you can get value from your existing gear to make the transition faster.

Get A Free Buy-Back Quote

If your equipment has any remaining value we will pay top dollar if the equipment is deemed as re-marketable. We can usually turn around a valuation in 7-10 business days. Please note that not all equipment has re-marketable value so occasionally we will pass on equipment. In this case, we have solutions to help you remove this equipment from your data center and responsibly recycled.
