

Benefits of Renting IT Hardware

- **Flexibility** to rent either short term or long term (one month to one year).
You always have the option to extend the rental or purchase the equipment.
- **OPEX versus CAPEX** allows you to get the equipment you need *today* for urgent projects that just can't wait.
- Monthly payment model allows for **Capital Preservation** so you can stretch your IT budget and get more accomplished.
- Perfect for short term, **Seasonal Demands** that require additional compute performance or capacity to handle increased business activity.
- **Technical Requirements** for swing gear for data migrations, data center moves, Test/Dev, proof of concept, or performance comparisons.
- **Rent Anything** - Fully configured servers / storage / networking or temporary upgrades from all the major OEM platforms.
